

Sustainability Circles®

STEP UP AND POWER DOWN

Inspire employees, reduce energy costs and create a custom sustainability plan

Sustainability Circles® bring together representatives from 10 local businesses for 5 sessions over 5-months to complete a comprehensive peer-learning program. The outcome is a customized Sustainability Action Plan designed to reduce your energy and water use, and your waste production, lower operational costs and cut CO₂ emissions. Empower your people by making sustainable practices part of the way you do business.

You can see substantial results!

Step Up and Power Down brings the proven value of a Sustainability Circle to you at no cost. These are the projected annual savings* of past Sustainability Circle participants:

30 initiatives	316,133 dollars	1,495,618 kWh
1,059 tons CO ₂	2,141,844 gallons of water	

"This is a great way to put momentum behind your sustainability efforts... It will help you improve your employee engagement, promote your brand and ensure higher profits by helping you find better ways to do what you do."

—Gary Onstad, Product Development,
The Ken Blanchard Companies

You'll learn to:
